COFFEE SHOP REDESIGN

I redesigned the branding for a local coffee shop that provides the community with a relaxing place to unwind.

CODING
BY DESIGN

```
styles.css
1 font-family: "Source Serif 4";
2 font-size: 76px;
3 font-weight: bold;
```

What if you could learn the core skills you need to code a website while building out your portfolio site exactly how you want it to look, function, and feel?

View course outline ☰

All website builders — such as Webflow, Wordpress, Squarespace and Framer — are just interfaces that output HTML, CSS, and JavaScript code. But they don't offer the total design freedom that you get if you bypass the middleman and code it from scratch.

```
styles.css
1 padding: 32px
2 background-color: #7156BB
3 border: 2px solid #7156BB;
```

Believe it or not, but you already know most of the basics of coding a website just from being a designer!

- You know the “why” behind the layout design choices you make.
- You are an expert in typographic hierarchy and the styling that is required to achieve it.
- You’ve organized content like titles, headings, captions, labels, and images.

MYTH

Website builder platforms mean that I don't need to know how to code.

Get the facts ↔

MYTH

The only designers who know how to code do UX or web design.

Get the facts ↔

There are a lot of myths about web development:

Relevant practice

Each lesson has a short practice segment at the end where you will learn by building your own completely unique and custom design portfolio website.

Completely free

You can complete this entire course for free! If you want to increase your file storage, you will have to cover that cost.

You own everything

You have full ownership of all your code, content, and assets that you create and upload to this platform.

Secured in the cloud

All your files and assets will be securely stored in the cloud, and you can download your files any time you want.
