

# Your financial goals

Dashboard

Table

Add goal

+

Retirement and college fund

**Save \$4,250/year for retirement, and \$4,250/year for the college fund**

A little behind

\$3,400/\$8,500

40%

**Tips**

- If you need to put a little less towards this goal to cover more immediate expenses, that is ok!
- Consider what spending is essential, and what can be cut back.

College fund

**Get son's college fund to 15% of average tuition costs**

On track to exceed goal

\$12,000/\$15,000

80%

**Tips**

- Consider looking at less expensive schools as well as scholarships.

Emergency fund

**Build a \$2,500 emergency fund**

On track with room for improvement

\$1,250/\$2,500

50%

**Tips**

- Even putting a little bit of money towards this each month can go a long way.

College

**Net price calculator**

**U.S. Department of Education Net Price Calculator Center**

**Search for Schools' Calculator**

(Begin typing to search for schools)

**What does Net Price mean?**  
Net Price is the amount that a student pays to attend an institution in a single academic year after applying scholarships and grants the student receives. Scholarships and grants are forms of financial aid that a student does not have to pay back.

**What is a Net Price Calculator?**  
Net price calculators are available on a college or university's website and allow prospective students to enter information about themselves to find out what students like them paid to attend the institution in the previous year, after taking grants and scholarship aid into account.
