Frequently Asked Questions

What is a hackathon?

A hackathon is an innovation marathon. You'll spend 24 hours working with a team or by yourself to build an app, website, game, or any other tech project you can imagine!

Why should I come?

There will be prizes, food, networking, and coding workshops! You'll get to meet new people and learn new skills.

Who can participate?

College students in the CNY area (undergraduate AND graduate students are both welcome). We do not plan on offering a remote option.
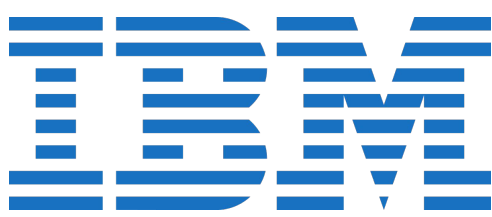

What if I can't find a team?

You can build a team beforehand, but there will also be team building activities at the event. You can also work by yourself if you prefer.

What if I want to sponsor CuseHacks?

CuseHacks is full of talented and passionate coders, developers, engineers, and designers who would love to learn about your company or organization! Check out our sponsorship package to learn more.
